tips

- This modern singalong classic released in 2018 needs a capo at the 5th fret to play in the same key as the original.
- It uses the same 4 chord progression for each of the different parts of the song so to avoid it sounding too repetitious trying changing the strumming pattern for different parts of the song such as just strumming once per bar for the quiet bits.
- If you are more advanced and can form bar chords then substitute the Fmaj7 for a full F bar chord.
