tips

- This 90s anthem is a must know song for all guitarists and has been played by cover bands across the world for almost 30 years.
- Although it has 4 chords it is perfect for beginners as the voicings used for these chords are easy for all levels to achieve.
- Try using a different strumming pattern for the quiet verses and loud choruses.
- You can swap the G6/F# for a D/F# if you want a bit more of a challenge but both will work fine with this song.
