tips

- Despite being only a 2 chord song, this 2007 released track can be tricky for beginners due to its fast tempo.
- The song is in 4/4 time so you can start off using a simple strumming pattern for the quieter parts of the song and gradually add more strums as you progress.
- If this is your first time playing a Dm chord you may find the stretch to get your 3rd finger on the 3rd fret B-string a bit challenging. You can use your 4th finger instead if it is more comfortable for you.
