

Seven Nation Army by The White Stripes

The main riff from Seven Nation Army is one of the most recognisable riffs ever written and an essential for all beginner guitarists to learn.

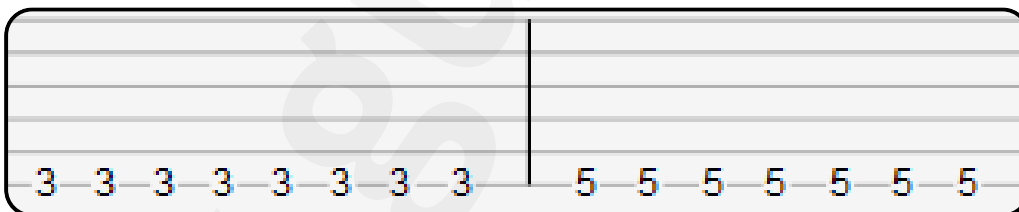

riff 1 - intro/verse riff

riff 2 - transition

riff 3 - chorus riff

tips

- For the intro and verse of this song just play riff 1 repeatedly.
- For the choruses - which essentially are just solos with no vocals - you alternate riff 1 with riff 3.
- When transitioning between verse and chorus and back again you play riff 2.
- If you know how you can use power chords for the transition riff.
